

TRAN ANH HAO

PRODUCTION CONTROL INTERN

📍 Thu Duc - Ho Chi Minh City 📞 0368632675 📧 trananhhao2k04@gmail.com  [AnhHaoTran](#)

OBJECTIVE

Final-year Logistics and Supply Chain Management student at HCM University of Technology, equipped with a strong data-driven approach to problem-solving, seeks a dynamic Production Control Internship. Eager to leverage a solid academic foundation in Logistics and Supply Chain Management, with a specific focus on production, to gain hands-on experience while contributing to the efficiency of production workflows. Hoping to evolve into a professional Supply Chain Specialist within a large-scale corporation, with aspirations to continuously enhance expertise and demonstrate value in future higher-level positions.

EDUCATION

HO CHI MINH CITY UNIVERSITY OF TECHNOLOGY

Oct 2022 - Present

Major in **Logistics and Supply Chain Management**

- **GPA:** 3.2/4.0 (Very Good)
- **Relevant Course:** Manufacturing Resource Planning, Quality Management and Control, Operations Management, Planning and Scheduling in Supply Chain

WORK EXPERIENCE

BOWKER VIETNAM GARMENT CO., LTD.

Mar 2026 - Present

Production Planning & Control Intern

- Processed 115+ extra fabric and accessory requests via the ERP system, identifying material shortages to prevent shop-floor bottlenecks.
- Successfully replenished materials for 70+ requests by transferring stock from unstarted production runs.
- Submitted 5+ procurement proposals to replenish depleted internal stocks.

DUY TAN PLASTICS MANUFACTURING CORPORATION

Jun 2025 - Aug 2025

Production Planning Intern

- Analyzed and identified 114.7 average daily production interruptions, resulting in a 38.8-ton output loss over two months.
- Analyzed shop-floor data via Pareto & Histograms, isolating ineffective mold maintenance as the root cause of 80% of disruptions.
- Proposed a proactive maintenance strategy at the 80-85% mold cycle threshold to optimize costs and ensure a seamless workflow.

PROJECTS

LOGISTICS SYSTEM DESIGN PROJECT ([Link](#))

Aug 2025 - Jan 2026

- Analyzed the inefficiency of the passive carton collection process to identify root causes, which caused high purchasing costs.
- Formulated a Matheuristics algorithm to optimize vehicle routes and collection schedules simultaneously, aiming to minimize total transportation and operational costs.
- **Result:** Outperformed the traditional method in large-scale scenarios, achieving a 20% – 60% reduction in total cost while significantly decreasing computation time.

SOFT SKILLS

- Good Communication & Teamwork
- Detail-oriented
- Proactive & Eager to Learn
- Adaptability & Flexibility
- Accountability

TECHNICAL SKILLS

- Problem Solving
- Data Analysis: Basic proficiency in Minitab 22
- MS Office: Word, Excel, PowerPoint
- English: Intermediate (Reading/Listening), Basic (Speaking)
- ERP systems: Basic proficiency in Inventory tracking, Order lifecycle tracking, Supplier pricing

ADDITIONAL INFORMATION

Certifications:

- Toeic Listening & Reading (Apr 2025): 795/990
- Productivity and Quality Management National Program (Jul 2024)
- Supply Chain Management and Analytics, provided by Unilever (Coursera)

Honors:

- Comprehensive Outstanding Student (2024 - 2025)
- Comprehensive Good Student (2024 - 2025)

Activities:

- Undergraduate Research (Mar 2026 - Present)
- Blood Donation (2023 - Present)
